B. C. Day, formerly of this county, and well-known for his efficient labors in educational fields in this state, favors us with a report of the schools of Easthampton, Mass., where he is superintendent. Mr. Day always puts method, energy and good judgment into his work, and his report shows much to his advantage.

We give considerable space to-day to the school superintendent's report of Barton. Mr. Fuller is a man who sees things with his own eyes and has a happy faculty of expressing his views. This report will be of more than local interest, inasmuch as it speaks quite at length of the town system and the present law.

Geo. H. Davis is having quite a run in his "enlarged picture" business, and had his last installment in his store windows last week. The artist seems to have a happy faculty of enlarging the beauty side of his picture, while the ugliness—this refers to men—is wiped out. We have our courage almost up to a point where we dare risk a picture.

A friend sends us an article on Neal Dow, asking us to print it this week, which would occupy two columns of space, perhaps more, and cost us more than two dollars for typesetting alone, and perhaps will regret that we can not do it. To-morrow will be Uncle Neal's 90th birthday and the temperance world will do him great honor, as he deserves.

Gen. Grout was home on a short trip of business last week. He prophesies that the democrats will pass their tariff bill in some shape, ere long. They have a way of whipping in such kicking members as rebel against the iniquitous measure. The General thinks the three years to come will be, from a business standpoint, the worst that have occurred in a generation.

Mrs. Polly Woodward, mother of Mrs. B. F. Peterson, died at Mr. Peterson's yesterday, after a long decline with paralysis. She came to this town several years since, making her home with her daughters, Mrs. B. F. Peterson and Mrs. J. N. Smith. She was a member of the M. E. church and led a faithful Christian life. Of late she has been in such a state as to require much care and labor, which have been bestowed upon her. The funeral will be held to-morrow at 10 o'clock a. m.

The lighting apparatus put into the H. C. Pierce store by A. B. Noyes & Co. of St. Johnsbury, proves to be a very effective lighting plant, clean, convenient and brilliant. The lighting material is a first-class kerosene, the burner has a round wick and the lamps are not particularly unlike other lamps. The oil is fed each lamp by a gravity and syphon arrangement with tubes running from a tank in the "back store" to the lamps, delivering just oil sufficient for the best working of the blaze. The light is almost as white and bright as an arc electric.

Several men from the village and vicinity went to Burke Saturday to witness the killing of a portion of the Darling herd of Jersey cattle, which were found to be affected with tuberculosis. Animals that were in good condition and apparently healthy, giving good milk, proved to be badly diseased, their lungs being partly decayed, solid, or in a state of disease that indicated an immediate breaking down. The examination was ordered by Mr. Darling and the discovery of the infected condition of his herd will occasion the loss of nearly a hundred cattle and several thousand dollars, as he had single animals which cost him exceeding \$1,000.

At a regular meeting of Grout Camp, Sons of Veterans, March 3, the following resolutions were adopted:

WHEREAS, It has pleased our Divine Commander to remove from our ranks our beloved and esteemed brother, Dana Folsom, by the hand of death,

Resolved, That we extend our sympathy to the bereaved family in their sad affliction.

Resolved, That while we mourn his loss and feel that his vacant place can never be filled, we rejoice that where he now is there is no more parting. Fraternally bound to us by such strong ties here, we trust that we may all be true to his memory, and determine that our lives may be such that we shall be prepared to meet him when the Captain of our salvation shall bid us come up higher.

Resolved, That these resolutions be printed in the MONITOR, and a marked copy sent to the bereaved parents and placed on the records of the Camp.

Do our readers remember that it was twenty years ago, 1874, when the snow nearly all went off in the early part of March and some commenced sugaring. In April the snow began to fall and during the month over five feet fell, the last storm at the end of the month finishing up the performance of winter with a fall of two feet. That year was the first when sugar buyers bought sugar to ship West. Skinner & Drew shipped a car load early in May, more than one hundred

teams coming into the village with sugar on the first day of May on runners. Before the next week had ended there was a big thunder shower and within a fortnight considerable spring work had been done.

The village meeting, held on Tuesday evening, was rather more lively than usual, certain up-town fellows trying to control the meeting, with the seeming attempt to ignore all other sections. The trustees' report showed quite a large sum expended last year in sewerage and in work made necessary by the new depot and the change in the line of railroad; also in tools for concrete work, lamps, etc. The present indebtedness, including expenses in moving the Catholic church, is something over \$600. The water commissioners' report shows that the present water rentals amount to about \$1,450, the increase in the rentals last year being something over \$300. The tax raised for the year will be 45 per cent—the same having been voted by the town. Five per cent of this will go into the state fund, only a small portion of it being received back to the village. There was about the usual colloquy on the inefficiency of our street lighting machinery, and a disposition shown to brighten up a little for the year to come. It was voted to have the reports of the village officers printed in the future. The following officers were elected: Moderator, J. P. Baldwin; clerk, H. T. Seaver; trustees, C. E. Hamblet, H. T. Seaver, J. P. Baldwin; treasurer, H. C. Pierce; collector, O. V. Joslyn; auditors, B. M. R. Nelson, O. D. Owen, F. W. Baldwin; wardens, J. N. Webster, E. F. Dutton, W. C. Brown; water commissioner to serve three years, B. B. Jerome.

One day week before last a well-dressed man appeared at N. D. Martin's livery stable, saying that himself and brother wanted to hire a team to go to Westmore. The team was hitched up and the men went away, not returning as agreed. Mr. Martin began to suspect that the men were either thieves or beats, and inquiry revealed the fact that the men and team were seen in Evansville, going northward. Geo. W. Ewins, Mr. Martin's hostler, was sent north in pursuit, and the result shows that he has done a very handsome piece of detective work in the capture of the thieves. He went to Rock Island, where the men stopped over night, the team not having been entered at the custom office. Ewins followed on to Sherbrooke and got another scent of his men going still farther north. At Windsor, he found that they had traded the sleigh for a wagon, pushing on toward Richmond, where he got track of them again, finding they had traded the wagon and harness for \$20, shipping the horse by rail to Montreal. By this time Ewins was close on them, and after finding that the horse had been delivered to the railroad stock yard, and taken thence to some unknown place, he hunted through the livery stables, finding the animal at last in a sales stable, the sale set for the afternoon. He concluded that the men would be back soon to look after the horse, and was not surprised to see the one who hired the team in Barton come in. Ewins had employed a detective, who was close at hand, and when the hostler followed the thief out of the stable, it was not long before he whistled up his companion, when Ewins pounced upon them, seizing both by their collars; quite a melee occurred, but the detective followed on and with the aid of the police the men were soon hurried off to jail. Ewins let them remain over night, when he visited them with an officer and after some coaxing made them acknowledge their crimes. They were taken into court and were in the hands of the court when the hostler-detective started back with his horse to gather up his sleigh and harness, all of which was done and the team brought home last week. Mr. Ewins did as thorough a piece of detective work as is often done, and he better drop the card and brush and enter a profession which will ensure better pay, and more interesting and exciting jobs. The names of the thieves are John Hefferman and Geo. Roome; they claim to have come from Lynn, Mass.

C., and a sister, Mrs. Pease of Burlington. On Nov. 2, 1852, she married Gov. David M. Camp; after residing here one year they moved to Montpelier, then to Milwaukee from which place they returned to Derby in 1866. Gov. Camp died Feb. 20, 1871. Mrs. Camp became a member of the Cong. church early in life, and has always been a very amiable lady much esteemed in the church society, in the community, and in all the circles into which she was drawn. The friends of Fred Clark who shocked a few days since to hear he died at Portsmouth, N. H., at the first of March. H., where Fred had spent part of the winter, revealed the fact that he had been dead about weeks. Further particulars are anxiously
